International Organic Certification
- 2016** Approval as an Agricultural Specialty Product Brand of  
Boseong County
- 2017** Organic Agricultural Product Certification

# OUR BUSINESS

For half a century in the heavenly green tea capital of Boseong, our company has been legally established as a specialist in traditional handmade tea with a foundation in eco-friendly cultivation and production know-how.

In this area which represents around 37% of the nation's tea plantations, the mountains, sea, and lakes are in harmony and the oceanic and continental climates converge to cause drastic fluctuations in temperature throughout the day, heavily inducing the formation of amino acids in the tea. Boseong is a prime place to cultivate the finest tea thanks to this synthesization of climate, soil, topography, lakes, and sea.

We are doing our best to produce high-quality tea with a rich natural aroma and taste, and we provide products with organic processed food, international organic, and Boseong County quality certifications through consistent care and attention.
